INSTITUTE OF ENGINEERING & MANAGEMENT, KOLKATA

SALTLAKE

(School of University of Engineering and Management, Kolkata)

Degree: BCA, Stream: BCA

Term – II, Second Semester Examination, March – 2026

Subject Code: BCAMD201

Subject Name: Mathematics for Computing

Full Marks: 30 | Set No:1 | Duration: 1 Hour

Part – A
Answer any 5 questions out of 6
Each question carries 2 marks (2 × 5)

1. Find D_3 from the following data: 5, 18, 17, 23, 25, 19, 10, 7, 35, 27, 22, 28. 2
2. In a set of 12 observations arranged in ascending order of magnitude, if 3rd term and 4th term are respectively 80 and 82, find Q_1. 2
3. Find the standard deviation of the following observations: 5, 7, 1, 2, 6, 3. 2
4. A die is tossed. If the number is odd, then find the probability that it is prime. 2
5. If A and B be events with P(A)= ½ , P(B) = 1/3 and P(A U B) = 2/3 then find $P(A \cap B)$. 2
6. A coin is tossed successively three times. Find the probability of getting exactly one head. 2

Part – B
Answer any 2 questions out of 3
Each question carries 5 marks (5 × 2)

7. From the following distribution of marks of 199 students in an examination find out the fourth decile (D_4): **5**

Marks:	0-20	21-30	31-40	41-50	51-60	61-70	71-80
No of students:	21	19	60	42	24	18	15

8. Find the variance of the following frequency distribution: **5**

Weight(in kg):	36-40	41-45	46-50	51-55	56-60	61-65	66-70
No of persons:	14	26	40	33	50	37	25

9. What is the chance that a leap year selected at random will contain 53 Wednesdays? **5**

Part – C
Answer any 1 question out of 2
Each question carries 10 marks (10 × 1)

10. Find the C.V of the following frequency distribution: **10**

Height :	60	62	64	66	68	70
f :	10	10	30	30	15	5

11. An urn contains 4 white and 6 black balls. Two balls are successively drawn from the urn without replacement of the first ball. If the first ball is seen to be white, what is the probability that the 2nd ball is also white? **10**

--- END ---
